Where service, quality & price matter

PRODUCTS FOR 2009

TIMBER- A RENEWABLE, SUSTAINABLE QUALITY RESOURCE OF NATURAL ORIGIN

FOR SERVICE, QUALITY & EXCEPTIONAL PRICES

What we do

Welcome to browse through the first ever leaflet that we have produced in over 10 years of trading. If you know about us, you'll have probably been trading with us for some years by now- if you don't, this leaflet will hopefully also be of genuine use to you when sourcing your timber needs.

We specialize in sourcing niche and mainstream timber products in wholesale quantities for clients who range from individuals to large corporations and buying groups to government bodies worldwide.

We source our timber globally from carefully chosen (certified when possible) producers who supply us with the very best of renewable materials sawn to the highest of standards- whilst respecting the environment.

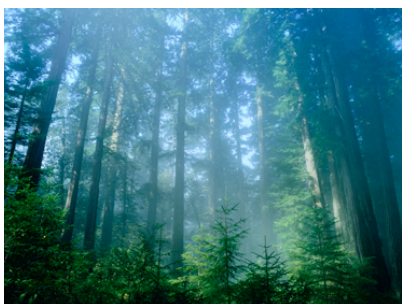

Our aim is simply to supply our customers with the very best of materials & products, delivered punctually- and at an exceptionally competitive price.

Products we offer

From pioneering products such as freshly sawn oak sleepers and treated softwood sleepers for the gardening market to being the first to offer a range of sleepers, juha.co.uk ltd specializes in a number of niche products from railway sleepers to products derived from both freshly sawn and dried oak to fencing timbers. We are currently trying to help revive the market for oak fencing in the south of England for example.

Many of our oak products in particular are produced by ourselves and our partners, in places as diverse as France and the Ukraine, Romania and the UK. Where we can source locally we do, where it makes sense to do so globally, we do so also. (Always taking into consideration environmental issues in particular).

We also specialize in sourcing specific timber requirements for projects worldwide.

ENVIRONMENTALLY RESPONSIBLE

FROM CAREFULLY SELECTED PRODUCERS

CERTIFIED WHERE POSSIBLE

Why buy from us?

As we head into ever more turbulent and competitive times economically, we believe that it will become even more important to trade with companies in the supply chain who offer that little bit extra when it comes to pricing, quality, service and financing. A sense of humour will help too. In juha.co.uk ltd you and your company will hopefully find one such partner.

For more detailed information on the products that we offer, and to see what else we can source, please visit the web site of our sister company TimberClick.com.
